

Chipotle FY25: Plan vs Actual

96% of the \$573M revenue miss came from lower customer traffic; cautious cost assumptions kept operating income within \$89M of plan.

FY25 Plan Revenue	FY25 Actual Revenue	Variance	Variance %
\$12,499M	\$11,926M	-\$573M	-4.6%

Why FY25 revenue missed plan by \$573M

Cost variance: lower sales vs cost per dollar

Chipotle FY23–27: Growth vs Profitability

Revenue grows ~9% a year from new restaurants, but operating margin falls from 16.9% to ~14% as cost inflation outpaces pricing

Revenue keeps growing, margin keeps shrinking

Company-owned restaurants

Comparable restaurant sales growth

Chipotle Outlook: Downside, Base, Upside

FY27: about \$650M separates downside and upside operating income. Traffic and cost ratios drive most of it.

Operating income path by scenario (\$M)

▲	\$ millions	Base	Upside	Downside
Total revenue		12,932	13,022	12,842
Food, beverage & packaging		3,888	3,882	3,893
Labor		3,305	3,301	3,307
Occupancy		699	699	698
Other operating costs		1,987	1,968	2,005
G&A		720	714	726
Operating income		1,833	1,956	1,713
Net income		1,398	1,490	1,308

▲	Driver	Downside	Base	Upside
	Comp sales, FY27	0.0%	2.5%	4.0%
	Comp sales, H2 FY26	0.0%	1.5%	3.0%
	Food cost % of revenue	31.0%	30.5%	30.0%
	Labor % of revenue	26.0%	25.6%	25.2%
	New restaurants, FY27	330	360	380
	Other opex % of revenue	16.0%	15.5%	15.0%

What it means

Downside: FY27 operating income falls to \$1.6B (11.8% margin). Year-end cash drops to about \$36M if buybacks stay at \$1.2B, so buybacks would need to come down.

Base: Revenue grows about 9% a year, mostly from new restaurants, but margin slides to 13.8% as costs rise faster than prices.

Upside: Needs 4% comps and food cost near 30% to reach \$2.3B operating income (15.6% margin).
